

The Plan

To Restore the Republic

Background

The Lighthouse Law Club (hereafter LLC) is an alliance and loose association of American individuals and various groups from around the country who are all involved in various efforts to protect and preserve freedom, life, liberty and prosperity with the rule of law, otherwise known as 'the American way of life' as it was intended and enjoyed for many generations. Collectively, we come together in a combined effort, wherein the LLC recognizes that each participating individual and each group or organization has its own designated role, function, expertise and energy to contribute in different ways.

The LLC desires to bring all Americans and other interested parties together in a common effort. We hereby present a simplified plan, (hereafter 'The Plan') to recapture, or 're-birth' the republic to ensure the accomplishment of our objectives in preserving freedom by reclaiming the 'power of the people' to self determination and of self government under the rule of law, in order to secure our own lives, liberty and property now and for our progeny in years to come.

Pretexts

Whereas the people have fallen into a disorderly state of malformed and inadequate education and are ill equipped in general, to properly assume and execute their duties and responsibilities as 'Principals' of government,

Therefore, a vacuum of authority has been allowed to exist and has subsequently been filled by nefarious foreign powers and interests who are systematically committing legal 'genocide' by denying an entire class of people, historically recognized as the 'sovereign Americans' living among the several states, their republican form of government in common law wherein the people are capable of self governance and self determination. This was the basis for the republic of the united States of America 'previously' becoming the greatest and most prosperous political experiment the world has ever known, where 'everyone' was welcome and had freedom to live according to their beliefs with opportunity to secure prosperity!

The net result of the peoples' abdication of this responsibility has already led them (us) to a state of servitude, poverty, hopelessness, corruption and evil beyond measure, so

Therefore, if each and every single American, or American resident, does not take direct personal responsibility and swift action to reverse this trend, then the inevitable result will be

the quick and complete destruction of the nation as we know it and with it, the future hopes of every individual directly or indirectly affected by what happens in America, (which is not just Americans but the entire world).

Given this understanding and warning, the LLC has painstakingly put together a core plan (The Plan) which will allow every individual to have a positive impact on not only the effort to restore the republic and his own future, but also will have a direct and very positive impact with many immediate benefits inuring to the individual and his family.

Let's capsulize 'The Plan' and the 'Immediate Benefits' which you may enjoy in short order, and then we will present 'the entire platform' in complete detail in a more lengthy treatment of the various issues involved, in another document.

'The Plan' - in brief

- 1...Education
- 2...Your Finances
- 3...Local Governance

#1... Education:

There is absolutely **no hope** to restore the republic under current conditions. Those conditions we find now are a near complete collapse of the educational system leading all of us to an almost absolute level of ignorance of the relevant key issues. This must change for any results to be achieved. The LLC , among others, is here to help.

Most of us don't really understand the true problem so it would be **impossible to even discuss solutions**. Hint: It has nothing to do with political parties or 'who' is in office!

A **functional republic** where people have self governance, rule of law and a level playing field where opportunity grows like weeds, requires a strong people.

To **be strong**, people need a healthy;

- knowledge base,
- participation in civic affairs
- educational references and intellectual resources.
- solid personal financial footing and economic opportunity,
- support structure, network and local community interaction,
- strong leadership,
- moral code and common values.

The LLC will address these issues to help **improve each of these areas** for all participants.

Once each of us has strengthened ourselves personally, only then can we move forward to **take control** of our local communities, counties and then the states! If we are successful, the **foreign agents who have bought Washington D.C. will go home and stay there** and leave us alone, once they know we are serious! And they can take their debt with them because it is NOT Ours!

But when everyone is home watching 'Dancing with the Stars' and nobody cares or is doing anything about the pillaging and over reach, why should they stop raping us? You have given them no reason to stop! Chances are **'you' are not doing anything** about it.

Well **now you can!** The LLC brings you an opportunity to **'Stand Up' and make a difference!**

Through the combined efforts of all those participating in the LLC, education is more than abundant. The **research has already been done**. The solutions have already been found. All we need are citizens to pay attention, turn off the T.V., learn, get involved and help spread the word.

The LLC will do its best to channel only the **best and most pertinent information** into our learning centers. The information in general is overwhelming in not only volume but also in impact and importance! This is very serious and we are here for serious results! Many of us have done our homework over the last 30 years or more to get to this point.

Some of us will specialize in certain areas and we already are. But we all need a solid general footing in legal principles and the *lawful operation of the republic*. And we *all need to come together*. Veterans groups, Oath Keepers, family advocate groups, home schooling organizations, researchers, authors, teachers, tea party, tax watchdogs, freedom fighters of all types, sizes, ages and ethnicity need to come together in the LLC to start forming local coalitions. This is where LLC can support you. **Join LLC** and use it as a *networking center and resource library* to learn and connect with others!

#2... Personal Finances.

The law is almost *perfect 'as is'* for our immediate purposes. Very little if anything needs to be changed in this regard. It just needs proper use and enforcement. The strategy is simple:

- *Increase the personal finances* of 'the people' and the people *gain independence*.
- Decrease the vast illegal revenue streams to the government and the *government shrinks*.

The power of the people grows. The power of the government diminishes. It's a simple formula in a zero sum game. The law provides us the solutions. This is only a beginning however.

The government has grown to its current unsupportable levels due to outright theft from the people and the law provides us with remedies RIGHT NOW! But if we don't know any better, we just keep feeding the beast at the expense of our families, who pay the price! Are you ready to change?

How do we do this?

You learn to exert your rights, according to the law, to reclaim;

- **your labor** - which the courts hold as 'sacred personal property' which is not subject to taxation. There is a section of the Internal Revenue Code that nobody is telling you about and your tax preparers ignore. 'No income tax on your labor.' It's the law. You win!

- **your right to travel** - which the law holds in every state as a 'free right of the Public' and not subject to regulation (i.e. licenses, fees, fines, tickets, extortion and control).
- **your right to honest banking** and lending practices. Under the current 'system' all bank loans are fraudulent. We'll show you in the law and using modern accounting practices how to prove it. This system was developed by a renowned CPA who is routinely used in the courts as an expert witness for unimpeachable testimony and expertise. You'll have your creditors shaking in their boots and begging you to let them 'zero out' your balance if you 'just don't bring it into open court!' They are afraid of an avalanche! They'll 'work with you'! You need to learn this!
- **your right to use the laws of 'negotiable instruments'** (U.C.C.) just like the bankers do. Use only 'credit' and your signature to pay corporate bills and government taxes (no cash). It's being done successfully across the country. It's the law! Education is required.

So, if we could show you directly from the Internal Revenue Code, Social Security Act and other sources of the federal legislative statutes how the law allows you to **take home your entire paycheck** without deductions for: FICA, FUTA, or any and all withholding for income taxes, and how the courts have made these issues 'well established' in the law, how would that **affect your personal finances** and your family's future?

If we could show you the law and how all bank loans, car loans, student loans, credit card balances and related debt is fraudulent and can be nullified or 'discharged' by law, would being **debt free** help your family? We will prove it to you! It's black and white.

#3...Local Governance

Citizens of the republic must **re-assume a leadership role** in the local government of the republic and NOT 'THE STATE'!

We have a very specific plan for this in establishing: **Citizens Commissions**. The citizen commission concept is one in which informed and responsible citizens will come together to **form their own 'oversight body'** to do nothing more than issue non-binding, public 'opinions', make recommendations and **report crimes to the local Sheriff**.

This is NOT a citizens Grand Jury (yet) but merely a community **council of volunteers** who are NOT pretending to be a 'court' to compete with the authority of THE STATE (yet). It is non-confrontational other than confronting criminals who are committing crimes. The citizens commission will shine a light on nefarious operations, illegal actions, hold public officials, private citizens and private businesses **accountable to the law**, through the mere act of

exposure. The commission will act as a type '*advocate for citizens*' in need of justice and proper government and will 'out' the criminals in the public square.

It's decisions and activities will be prominent in the public eye with a high level of publicity and as the public sees the value and advocacy which they have in this commission, where no attorneys or state officials are involved, it will grow in esteem with popular support and have added weight and authority as time goes on.

There will come a point in time, that with sufficient popular and political support, the 'commission' will morph into a more substantial 'body' carrying the weight of the law within it's authority. You know what I'm talking about. Enough said on that for now. Point made.

Are you prepared to assume your role and responsibility as 'principal' of government? Are you ready to improve your knowledge, enhance your finances, and stand tall with POWER as an informed citizen and principal of government?

Individual Membership in the *law club is free*. It costs nothing and no credit card information is asked for, period. You register and you're in!

The project is scheduled for official launch July 04, but you can *JOIN NOW in pre-launch*. We just ask that you '*Pardon our dust*' as we continue to develop the web page. It is not complete yet. (It's a monster!)

Your future depends only on YOU! What are YOU going to do about it? Are you up to the challenge? Protect your future.... Save the republic...

Join now and bring your friends with you! www.lighthouseliberty.club

May God Bless us All!
